

The world's only plug-'n-play Network Access Control solutions

*Nitin Aggarwal
International SE Manager
nitina@netclarity.net*

- **NetClarity Introduction**
- **BYOD/NAC Security Dilemma**
- **NACwall “Live” Demonstration**
- **Q&A and Next Steps**

- Headquartered in Bedford, MA., USA.
- Sells security appliances through a network of distributors and resellers worldwide
- Thousands of appliances deployed
- Billions of dollars protected by NetClarity

We provide the world's only plug-'n-play NAC.

- Explosion of mobile devices in the workplace
- Hackers focusing on mid-sized companies
- Mobile malware on trusted devices

HOW DO BREACHES OCCUR?

81% utilized some form of hacking (+31%)

69% incorporated malware (+20%)

Trusted users are connecting untrusted devices (threats) to your network...right now

- 2012 (U.K.) “**51%** of business networks were breached due to employees using personal devices” -[FiercemobileIT](#)

You need visibility and control over every device connecting to your network

Personal AND Professional

Wired AND Wireless

ANY operating system

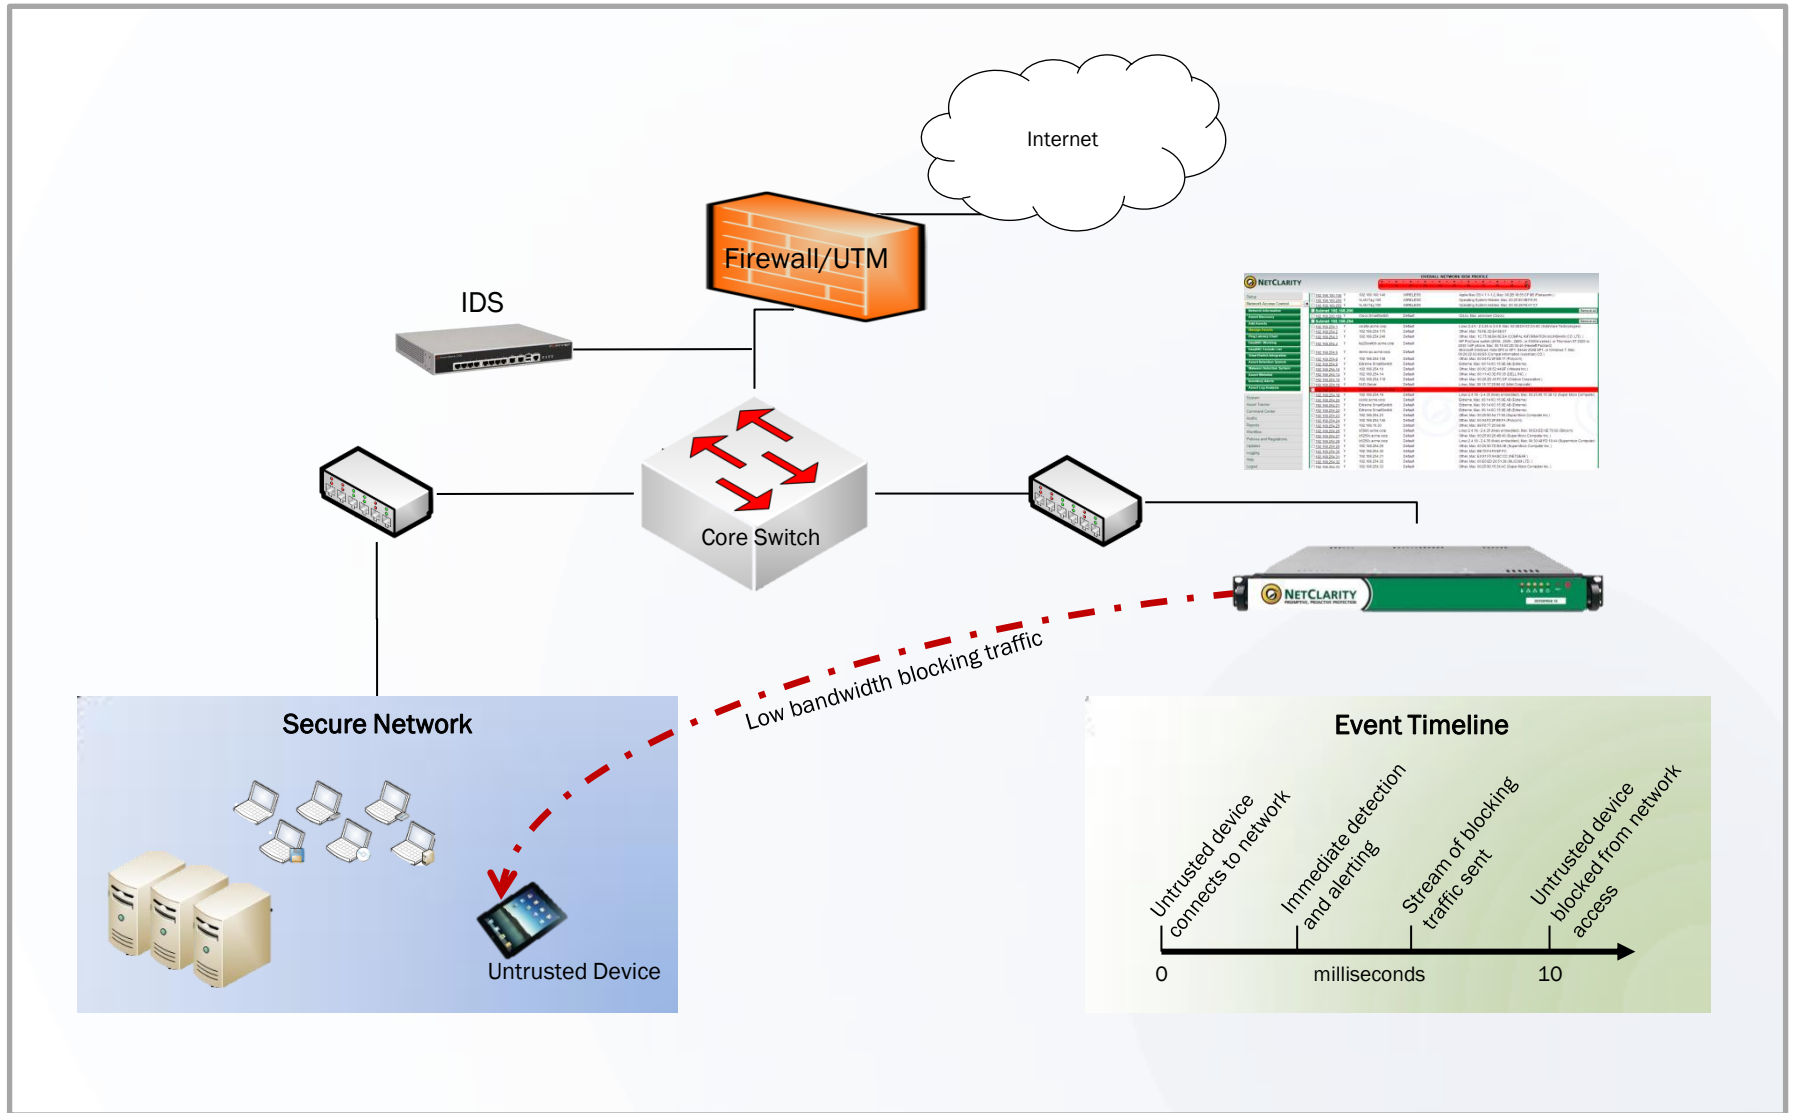

You need a network access control solution

- **Immediately control access** by any and all types of devices – if you don't want them on the network, they don't get on the network.
- **Identify network holes** (CVE®s) on the inside of your network and guide proactive remediation process
- **Defend against malware** through automated detection and blocking

Scalable from 25 devices to thousands of devices

NETCLARITY NetClarity's unique agentless design

	Out of band technology	Automatic blocking	Device agnostic	Installs in minutes	Simple to manage	Agentless
NetClarity's NAC solution						
Competing solutions						

... and NetClarity does it cost-effectively for mid-sized businesses

“We’ve been watching NetClarity for some time. In our view, this company is amongst the most innovative we’ve seen.”

- SC Magazine

“The Most Innovative NAC Vendor in the World”

- Network Products Guide, Hot Companies

“NetClarity Picks Up Where Firewalls, Anti-virus, Intrusion Detection Systems and Intrusion Prevention Systems Leave Off.”

- John Gallant, President, Network World
